

Work-life balance is not about changing yourself... It's About Changing the System!

Excellent treatment mechanics should allow the orthodontist to deliver optimal treatment to most patients, in the most **efficient** and **simple** way, maximizing state-of-the-art GC/TOMY active self-ligating appliances and the 3-wire sequence. These are the necessary elements to consistently deliver quality results.

Dr. Secchi is the founder of the Complete Clinical Orthodontics System™ (CCO System), which he teaches to orthodontists not only in the USA, but throughout the world. His passion for clinical orthodontics and commitment to education have made him a solicited lecturer at a national and international level. Because of his extensive clinical experience, Dr. Secchi brings world-class care to every patient he treats.

The CCO creates a significant point of differentiation for you and your practice.

GLAO 2026 Annual Session
