

Year-End Tax Strategy: Consider Purchasing Needed Equipment

If you are a practice owner in need of new equipment that will increase your ability to make more money in the future, consider purchasing items and having it placed in service by December 31, 2025.

[TechSelect](#) is an excellent resource for AAO members who are shopping for equipment in these categories:

- [3D Printers](#) for in-house retainers, aligners, splints, etc.
- [Intraoral Scanners](#) for digital workflows
- [Wirebenders](#) for bonded retainers and finishing arch wires
- [Practice Robots](#) for office assistance

You can explore evaluation criteria from the Committee on Technology (CTECH), compare products side-by-side, and save money by locking in the lowest available price — all included in your AAO membership.

Before purchasing, consult with your tax advisor to ensure this is the right approach for your practice.
